

# Dee, The Beautiful Whale Invites You to Come Inside

## Experience A Life-Size Whale

Grades 3-5, 45 Min.

Save The Whales is funding a limited number of FREE programs for Grades 3-5. Schedule today for an unforgettable and unique learning opportunity. Dee is presented by Marine Biologists and Educators with hands-on displays who also provide supporting educational materials at no charge.

See second page for program details.

### To schedule:

Maris Sidenstecker, Marine Biologist  
E: [Maris@SaveTheWhales.Org](mailto:Maris@SaveTheWhales.Org)  
P: (831) 899-9957

### Program aligns with State Science Curriculum Standards

- 🐋 Experience Dee to feel her immensity and touch her vital organs.
- 🐋 Learn how pollutants can impact her health and how we can help.
- 🐋 Learn how runoff from watersheds and storm drains flow to oceans.

Save The Whales is a nonprofit 501(c)(3) organization founded in 1977. Our mission is to preserve and protect the ocean and its inhabitants. Save The Whales has educated over 306,000 students.

## Dee, The Beautiful Humpback Whale Ambassador

Dee, a 43-foot life-size replica of a humpback whale, features internal organs which students can appreciate by entering her body! Learn about whale **anatomy**, **adaptations**, **stormwater pollution**, and **marine debris** and how students can make positive changes to protect marine inhabitants. Students learn how whales communicate and feed. Through a collection of whale artifacts, students can touch baleen, and can view krill (whale food). Participants will become “junior scientists” by observing similarities and differences between whales and us. Be amazed by the story of Dee and how she is an **anti-bullying** ambassador. Your students will be inspired to conserve and protect our oceans where these incredible mammals live.

### Program Reviews

*“Dee the Whale was a fantastic interactive and engaging program! By being able to walk through Dee, my students left with a deeper understanding of whales, their structure and the role humans play in their lives. This was a unique and memorable experience for my kids as they have continued to talk about its impact for days after.”*

Kim Cornfield, Grade 4 Teacher, International School of Monterey

*“Maris and the Save the Whales staff are enthusiastic, wonderful people who engage the children in learning about whales and about how our everyday choices can impact marine mammals. In an interactive 45 minutes, the staff covered everything from whale anatomy and sounds to watersheds and storm drains, and how everything ends up in the ocean.”*

Blair Cronin, Grade 4 Teacher, All Saints' Day School

*“If someone is fortunate enough to see a whale in the wild, it is usually from a long distance, and never from the inside. Dee the Beautiful Whale affords school children the unprecedented opportunity to view a whale from the inside and to feel its immensity.”*

Diane Glim, American Cetacean Society, Past President

**Dee's Requirements:** Electrical outlets and a large indoor space, at a minimum of 43' long x 26' across x 6.5' tall. Dee cannot be outside unless enclosed by a large tent which host must provide.
